Raditya Pratama

Digital Transformation Developer

Indonesia | radityaprtm2002@gmail.com | github.com/radityaprtm

PROFESSIONAL SUMMARY

Electronics and Instrumentation graduate from Universitas Gadjah Mada with approximately two years of experience developing enterprise applications and digital-transformation solutions at TelkomSigma and LG Electronics R&D. Experienced in workflow automation, API integration, and frontend development for AI-enabled business applications. Gained introductory SAP exposure through discussions with SAP support and development practitioners at TelkomSigma. Seeking to build on this foundation through the SAP Young Professionals Program and pursue a career in SAP consulting.

PROFESSIONAL EXPERIENCE

LG Electronics R&D Center Indonesia

Junior Research Engineer - Digital Transformation Developer | April 2026 - Present
Cikarang, West Bekasi, Indonesia

Leading assigned DX/AX initiatives within TV R&D, connecting engineering workflows, operational data, and full-stack applications.

- Built a BOM validation tool with Next.js, React, and Jira integration, reducing checks for hundreds of TV models from approximately two working days to under 10 minutes.
- Developed a TV model monitoring system with Next.js, PostgreSQL, and Prisma, including new-model detection and change notifications.
- Integrated Jira, internal APIs, databases, and engineering sources to automate validation and data monitoring.
- Built a browser-based TV debugging application using the Web Serial API and RS-232 communication.

PT. Sigma Cipta Caraka (TelkomSigma)

Junior Programmer | September 2024 - April 2026
Sleman, Yogyakarta, Indonesia

Developed enterprise web applications and AI-enabled business interfaces across internal and client projects.

- Developed Next.js and React frontend features and chatbot interfaces for an AI-assisted sugarcane-inspection application for PT Sinergi Gula Nusantara.
- Built Nuxt.js chat, conversation history, and document-management features for a RAG-based enterprise risk-management chatbot.
- Contributed to CMDB, CRM, risk-management, and knowledge-management applications using Vue.js, Nuxt.js, Next.js, and React.
- Integrated and tested REST APIs using Axios, Postman, and Swagger UI, including connections to Python FastAPI services.
- Used Git, GitHub, GitLab, Jenkins, and GitLab CI/CD for collaboration and deployment.
- Gained introductory exposure to SAP L1 managed operations, ABAP, and SAP Fiori through discussions with support and development practitioners.

Madrasah Mu'allimin Muhammadiyah

Part-time ICT Teacher | June 2024 - September 2024
Sedayu, Bantul, Indonesia

Introduced students to programming, networks, and web technology through practical learning.

- Taught programming fundamentals, algorithms, Industry 4.0 concepts, computer networking, and web technology.
- Mentored hands-on coding activities using Code.org and Scratch.

Geoseismal Research Center / Upstream Innovation / Pertamina Hulu Energi

Hardware and Instrumentation Developer | July 2022 - December 2022
Bulaksumur, Yogyakarta, Indonesia

Developed instrumentation for geophysical self-potential measurements and field data acquisition.

- Designed signal-conditioning circuits, sensor integrations, and data-collection systems.
- Programmed SBC and microcontroller platforms with C, C++, and Python for automation and measurement control.
- Calibrated and tested instruments and porous pot electrodes for resistivity and impedance measurements.
- Developed multiplexing relay switching systems for automated self-potential data extraction.

SELECTED PROJECTS

BOM Automation & Validation | LG Electronics R&D

Built a Next.js/React tool integrating Jira data to validate hundreds of TV models, reducing verification from approximately two working days to under 10 minutes.

TV Model Monitoring Platform | LG Electronics R&D

Developed a full-stack Next.js, PostgreSQL, and Prisma system to track TV datasets, detect new models, and monitor database changes.

AI Sugarcane Inspection | TelkomSigma / SGN

Developed a Next.js frontend and chatbot interface for an AI-assisted sugarcane-inspection platform and supported LLM integration.

Browser-based TV Debugging | LG Electronics R&D

Built a browser-based Next.js/React debugging application using the Web Serial API and RS-232 for direct TV hardware communication.

Risk Management AI Chatbot | TelkomSigma

Developed Nuxt.js frontend features for a RAG-based enterprise risk-management chatbot, including chat, conversation history, and document-upload management. Assisted a backend developer with OpenRouter-based LLM API integration using Axios.

Enterprise Platforms | TelkomSigma

Developed features across CMDB, CRM, and risk-management systems using Vue.js, Nuxt.js, Next.js, REST APIs, and Axios.

Knowledge Management System | TelkomSigma

Developed a Vue.js Knowledge Management System for an Indonesian national data-center project to manage institutional knowledge and documentation.

Customer Relationship Mapping | TelkomSigma

Developed an Ant Design React UI-based frontend for managing stakeholders and tracking internal documents.

TECHNICAL SKILLS

Frontend: React, Next.js, Vue.js, Nuxt.js, TypeScript, JavaScript, HTML, CSS

Data & APIs: PostgreSQL, Prisma ORM, pgAdmin, FastAPI, REST APIs, Axios, API integration

Engineering & hardware: Python, C++, Web Serial API, RS-232, Arduino, Raspberry Pi

Delivery & collaboration: Git, GitHub, GitLab, Jenkins, GitLab CI/CD, Jira, Confluence

Systems & networking: Linux (Ubuntu / Fedora), Bash, SSH, TCP/IP, DNS, DHCP, VPN

Security foundations: SIEM fundamentals, Security monitoring, Incident response, Network security

EDUCATION

Universitas Gadjah Mada | B.Sc. in Electronics and Instrumentation

September 2020 - May 2024 | Sleman, Yogyakarta, Indonesia

GPA 3.75 / 4.00. Coursework in instrumentation, industrial automation, robotics, control systems, embedded systems, networking, electronics, programming, SCADA, and DCS.

EMURGO Academy | Cardano Developer Associate Program

June 2022 - December 2022 | Singapore

Study abroad coursework in blockchain development.

Newton British Academy, Barwa City | IGCSE, AS and A Levels

September 2014 - June 2020 | Doha, Qatar

British curriculum secondary education.

CERTIFICATIONS

Google Cybersecurity Professional Certificate - Google | 17 February 2026

Microsoft Azure AI-900 - Microsoft | 29 September 2025

Web Development and JavaScript Programming Basics - Dicoding | 20 January 2025

AI Fundamentals - Dicoding Academy | 20 January 2025

Writing Code Securely Awareness - PT SGI Asia | 15 January 2025

Fundamental Cyber Security - TelkomSigma | 7 October 2024

Millennial Career Evolution: ISO Quality Management (ISO 9001:2015) - PT Beniso Maju Bersama | 29 November 2023

Cardano Developer Associate - EMURGO Academy | 20 December 2022

LEADERSHIP & COMMUNITY

LG Olympics | Master of Ceremony

11 June 2026 | Cikarang, West Bekasi, Indonesia

Volunteered as a master of ceremony during the corporate social activity program.

Sigma Mengajar | Teaching Volunteer

21-22 August 2025 | Pamulang, Tangerang Selatan, Indonesia

Supported a CSR program providing fundamental education to children from underprivileged backgrounds, with an emphasis on confidence, communication, and creativity.

Gimbalabs Indonesia | Blockchain Facilitator & Developer

June 2024 - February 2025 | Yogyakarta, Indonesia

Co-facilitated Cardano and Web3 training on tokenization, NFTs, smart contracts, and Eternl wallets. Introduced secure data logging, traceability, and integrity concepts relevant to instrumentation and maintenance records.

ELINS Research Club | Robotics Project Contributor

June 2024 - December 2024 | Yogyakarta, Indonesia

Supported autonomous mobile robot navigation research in 2D/3D environments, sourced reference papers, and explored indoor navigation, ROS libraries, and basic SLAM concepts.

MESAMADA UGM | Head of Research Department

October 2021 - January 2024 | Doha, Qatar / Yogyakarta, Indonesia

Organized seminars introducing Indonesian higher-education opportunities to Middle Eastern students and promoted cultural collaboration and academic pathways for international candidates.

KKN-PPM UGM | Student Cluster Coordinator

June 2023 - August 2023 | Bambanglipuro, Bantul, Indonesia

Coordinated a 50-day community-development placement supporting MSMEs, food and wellbeing education to prevent malnutrition and stunting, and the implementation of village solar lighting.

Universitas Gadjah Mada | Digital & Analogue Electronics Lab Assistant

March - June 2023 (Digital); August - November 2022 (Analogue) | Yogyakarta, Indonesia

Supervised practical and theoretical sessions and exams. Co-authored practicum modules covering signal processing, logic gates, oscilloscopes, and semiconductor circuits. Used Cisco Packet Tracer for electronics and networking simulation.

LANGUAGES

English - Fluent | Indonesian - Fluent | French - Intermediate | Arabic - Beginner | Japanese - Beginner

HONORS & AWARDS

Level 1 Japanese Language Course (N3-N4) - Sun Asterisk / ANC Japan Kebun Tech | July 2025

Highest Achievement in French - Newton British Academy | 14 June 2017

Outstanding Progress in Arabic - Newton British Academy | 16 June 2015

Lego EV3 Mindstorm Robotics Competition - 2nd Place - The Little Engineer Qatar | 15 November 2015
